

Roger Nathanael

SUMMARY

Business Information Technology student at BINUS University Bekasi with a current GPA of 3.81, with academic experience in information systems, UI/UX design, programming, data modelling, machine learning, and IoT-based applications. Through various team-based projects, I have developed problem-solving, analytical thinking, communication, and collaboration skills. I am eager to gain professional experience, apply my academic knowledge in a real-world environment, and continue developing my technical and business-related skills.

2023 - PRESENT

GBI Pondok Gede Plaza

- Support multimedia operations during worship services and various church events.
- Coordinate with team members to ensure smooth execution of events.
- Work in time-sensitive situations while maintaining focus, accuracy, and responsibility.

ACADEMIC PROJECTS:

IOT SMART SAWIT PLANTATION

Developed an IoT-based smart plantation solution to support monitoring and decision-making in palm plantation management. The project combined IoT concepts, sensor-based monitoring, and technology-driven problem solving and achieved 1st Place.

HEALTHYLIFE HUB

Developed a web-based health education and monitoring platform using programming and database concepts. The project involved designing user-oriented features and connecting application functionality with structured data.

AQUUAS

Designed a digital product concept for fish hobbyists using user persona, user journey, task flow, wireframe, navigation map, and component style. The project strengthened my understanding of user-centered design and product development.

CUSTOMER CHURN PREDICTION

Developed a customer churn prediction project using Random Forest, Decision Tree, and Logistic Regression. Explored data preparation, feature selection, machine learning models, and model evaluation.
